Experience

Before he ever joined Laser Spine Institute's highly skilled surgical team, Dr. Keith Girton had already cultivated a spirit to serve. It began early on while serving at Scott Air Force Base, where he proudly cared for his fellow troops in his role as an Orthopedic Surgeon for the United States Air Force Medical Center. Three decades later, his spirit to serve is still going strong.

Prior to his arrival at Laser Spine Institute, Dr. Girton created a highly distinguished track record of success as an Orthopedic Surgeon at Ashland Regional Medical Center and Lehigh Valley Hospital – Hazleton, both in Pennsylvania. He also provided the highest level of compassionate care to patients at a variety of hospitals and medical institutions including, Lock Haven Hospital, Pinnacle Health Hospitals and HealthSouth Surgery Center.

A graduate of Ohio State University College of Medicine, Dr. Girton is board certified by the American Board of Orthopaedic Surgery and the American Board of Independent Medical Examiners. He is also a member of the American Academy of Orthopaedic Surgeons and the American Medical Association.

When not helping his patients find lasting relief from their chronic neck or back pain, Dr. Girton readily shares his knowledge and talents as a dedicated teacher, educating countless students in Advanced Cardiac Life Support — something he's done for more than 25 years.
